Selection Manual of Jasd series AC servo system

www.jmc-motor.com

Outline of JASD series AC Servo System

Features of JASD series servo

- ① Using DSP + FPGA dual chip platform and optimized current loop design, the driver has high dynamic response, extremely short setting time, stable operation and small vibration when stopping
- ② With automatic gain adjustment module, users can choose the rigidity level according to the demand.
- ③ Built in FIR filter and multi group notch filter can automatically identify and suppress mechanical vibration.
- ④ The built-in disturbance torque observer makes the driver have strong ability to resist external disturbance.
- ⑤ There are a variety of control modes for selection, position control, speed control, torque control, can switch various control modes.⑥ The input frequency of position pulse is 4MHz. It supports pulse + direction, orthogonal pulse, double pulse and other position command modes.
- ⑦ It has RS485 interface, supports Modbus communication, and can be flexibly applied to manipulator and other industries with memory function.
- ⑧ With programmable 8-channel input and 5-way output port, users can customize input and output through parameter setting, which is flexible.
- ⑨ Support incremental encoder and 17 bit, 20 bit high precision absolute value encoder.
- ⑩ It has perfect protection functions such as over-voltage, under voltage, over speed, overload, excessive position deviation and encoder error, and can memorize 8 groups of historical fault information.
- ⑪ With rich monitoring items, users can choose the monitoring items to monitor the running status.
- ⑫ The driver can communicate with PC through RS232 interface to realize simple and quick debugging of servo drive system.

JASD Servo driver

— Introduction —

JASD driver

200W	400W	750W	1.5KW	2.0KW	3.0KW
					

Description of servo driver model

JASD 400 2 - 20B - XX

① ② ③ ④ ⑤

Symbol	Name	Explain
①	Series name	JMC JASD series AC servo driver
②	Power of driver	100:100W 200:200W 400:400W 750:750W 1500:1.5KW 2000:2.0KW 3000:3.0KW
③	Power Supply voltage specification	1: Single phase 110V 2: Single phase / 3 phases 220V
④	Specification of encoder	2500:2500line 20B:Absolute M20B: Multi loop absolute
⑤	Product design serial number	Special function module, default to standard model

Name of each part of servo driver

Servo driver specifications

Electrical specifications

a) Single phase 220 V voltage level servo driver

Model JASD***2-**	200	400	750	1500
Single phase continuous input current Arms	1.9	3.2	6.7	8.8
Continuous output current Arms	2.1	2.8	5.5	8
Maximum output current Arms	5.8	9.6	16.9	19
Main current supply	Single phase AC180-240V, 50/60Hz			
Control current supply	Single phase AC180-240V, 50/60Hz			
Brake processing function	External braking resistor		Built in brake resistor	

b) Three phase 220 V voltage level servo driver

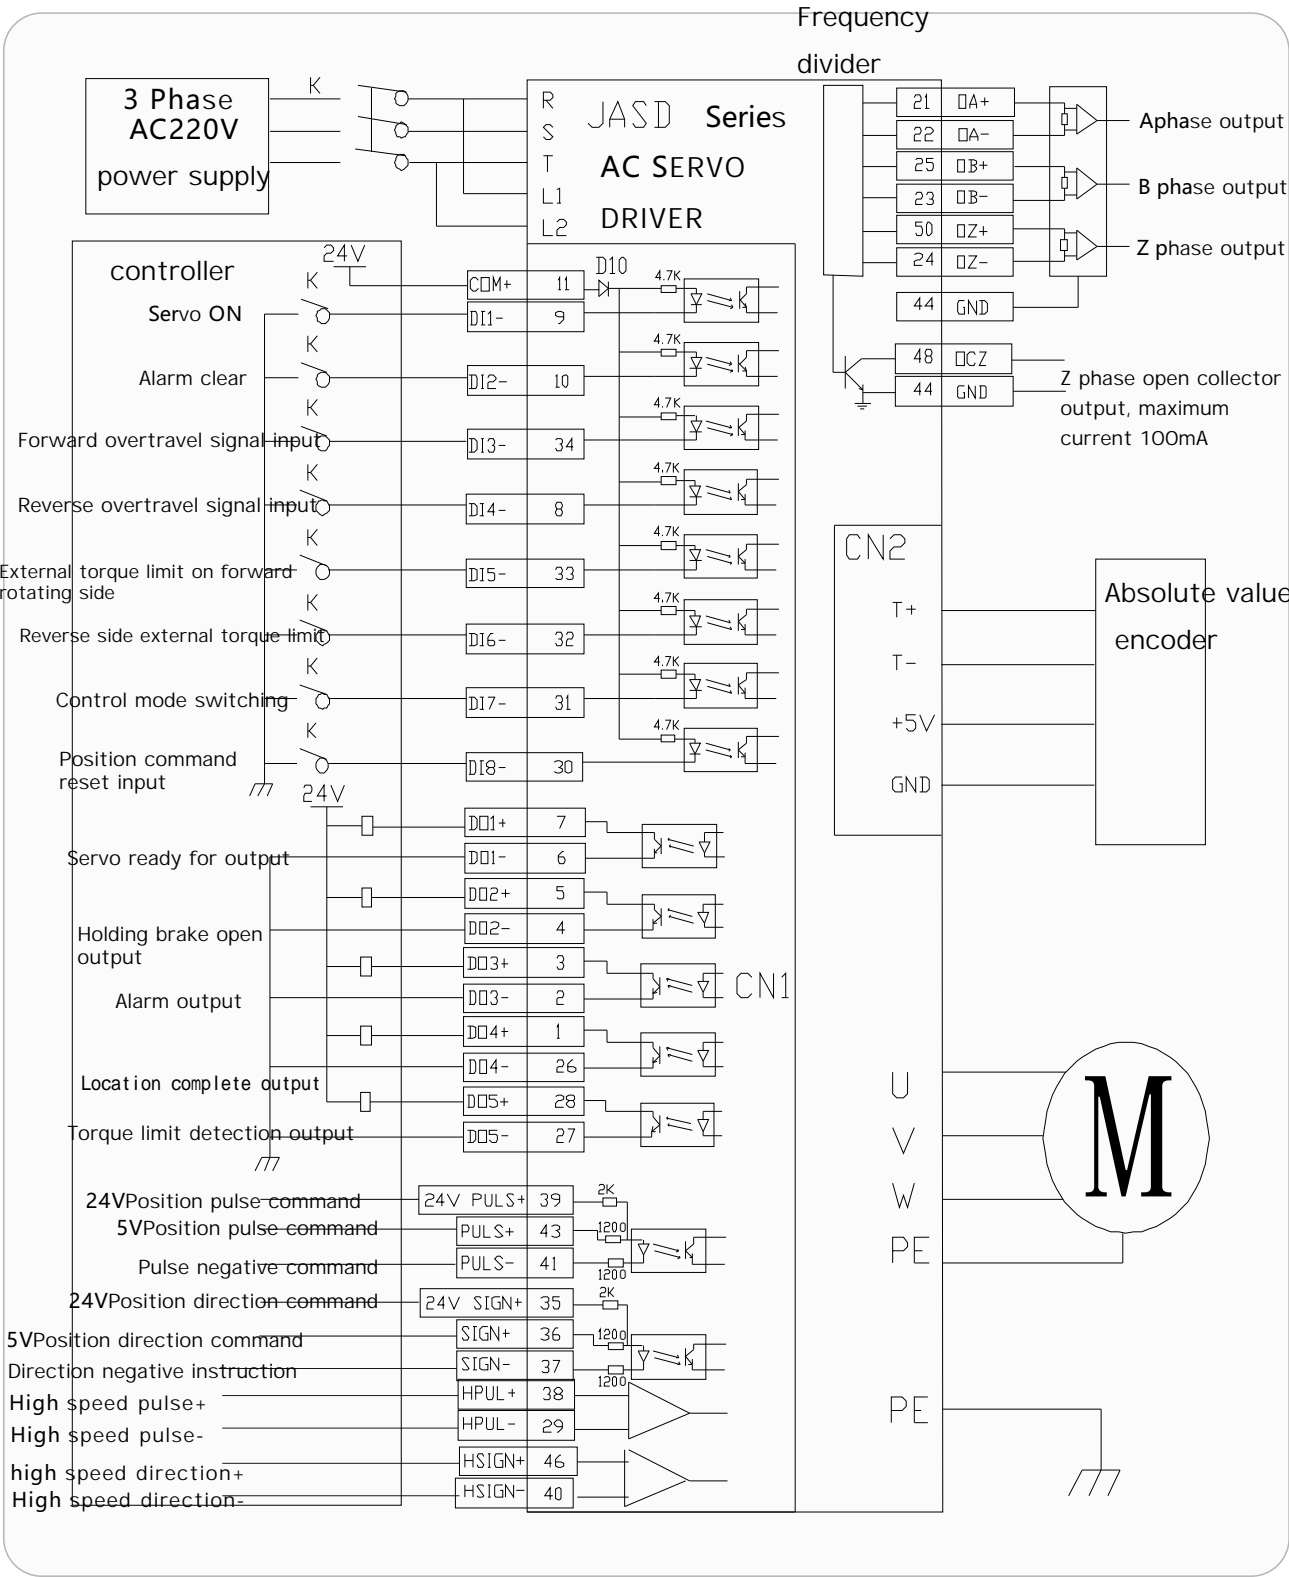

Model JASD***2-**	750	1500	2000	3000
3 phase continuous inputcurrentArms	3.6	6	8.7	11
Continuous output current Arms	5.5	8	14	20
Maximum output currentArms	16.9	19	33	50
Main current supply	3 phase AC180-240V, 50/60Hz			
Control current supply	3 phase AC180-240V, 50/60Hz			
Brake processing function	Built in brake resistor			

● Basic Specification

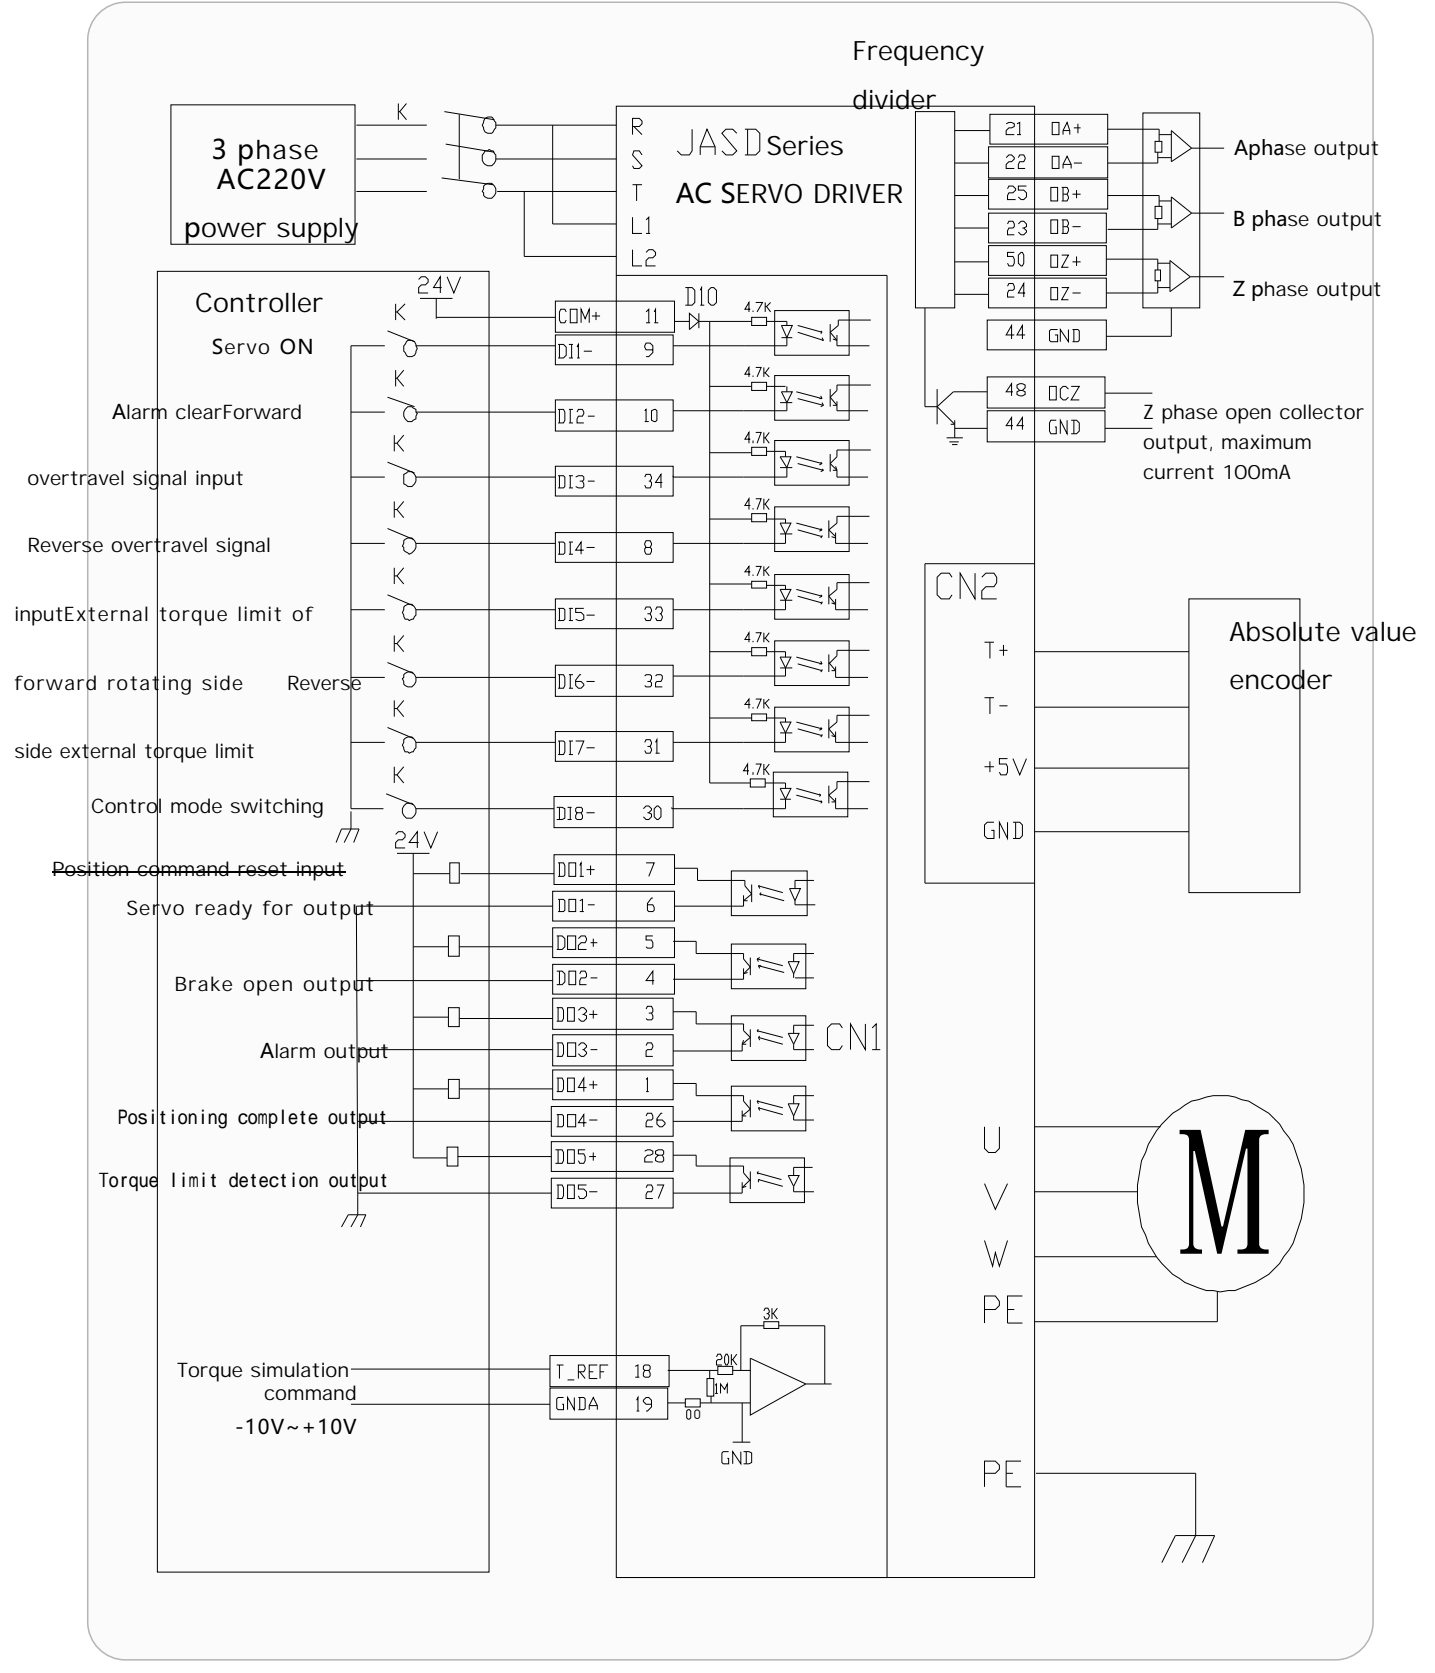

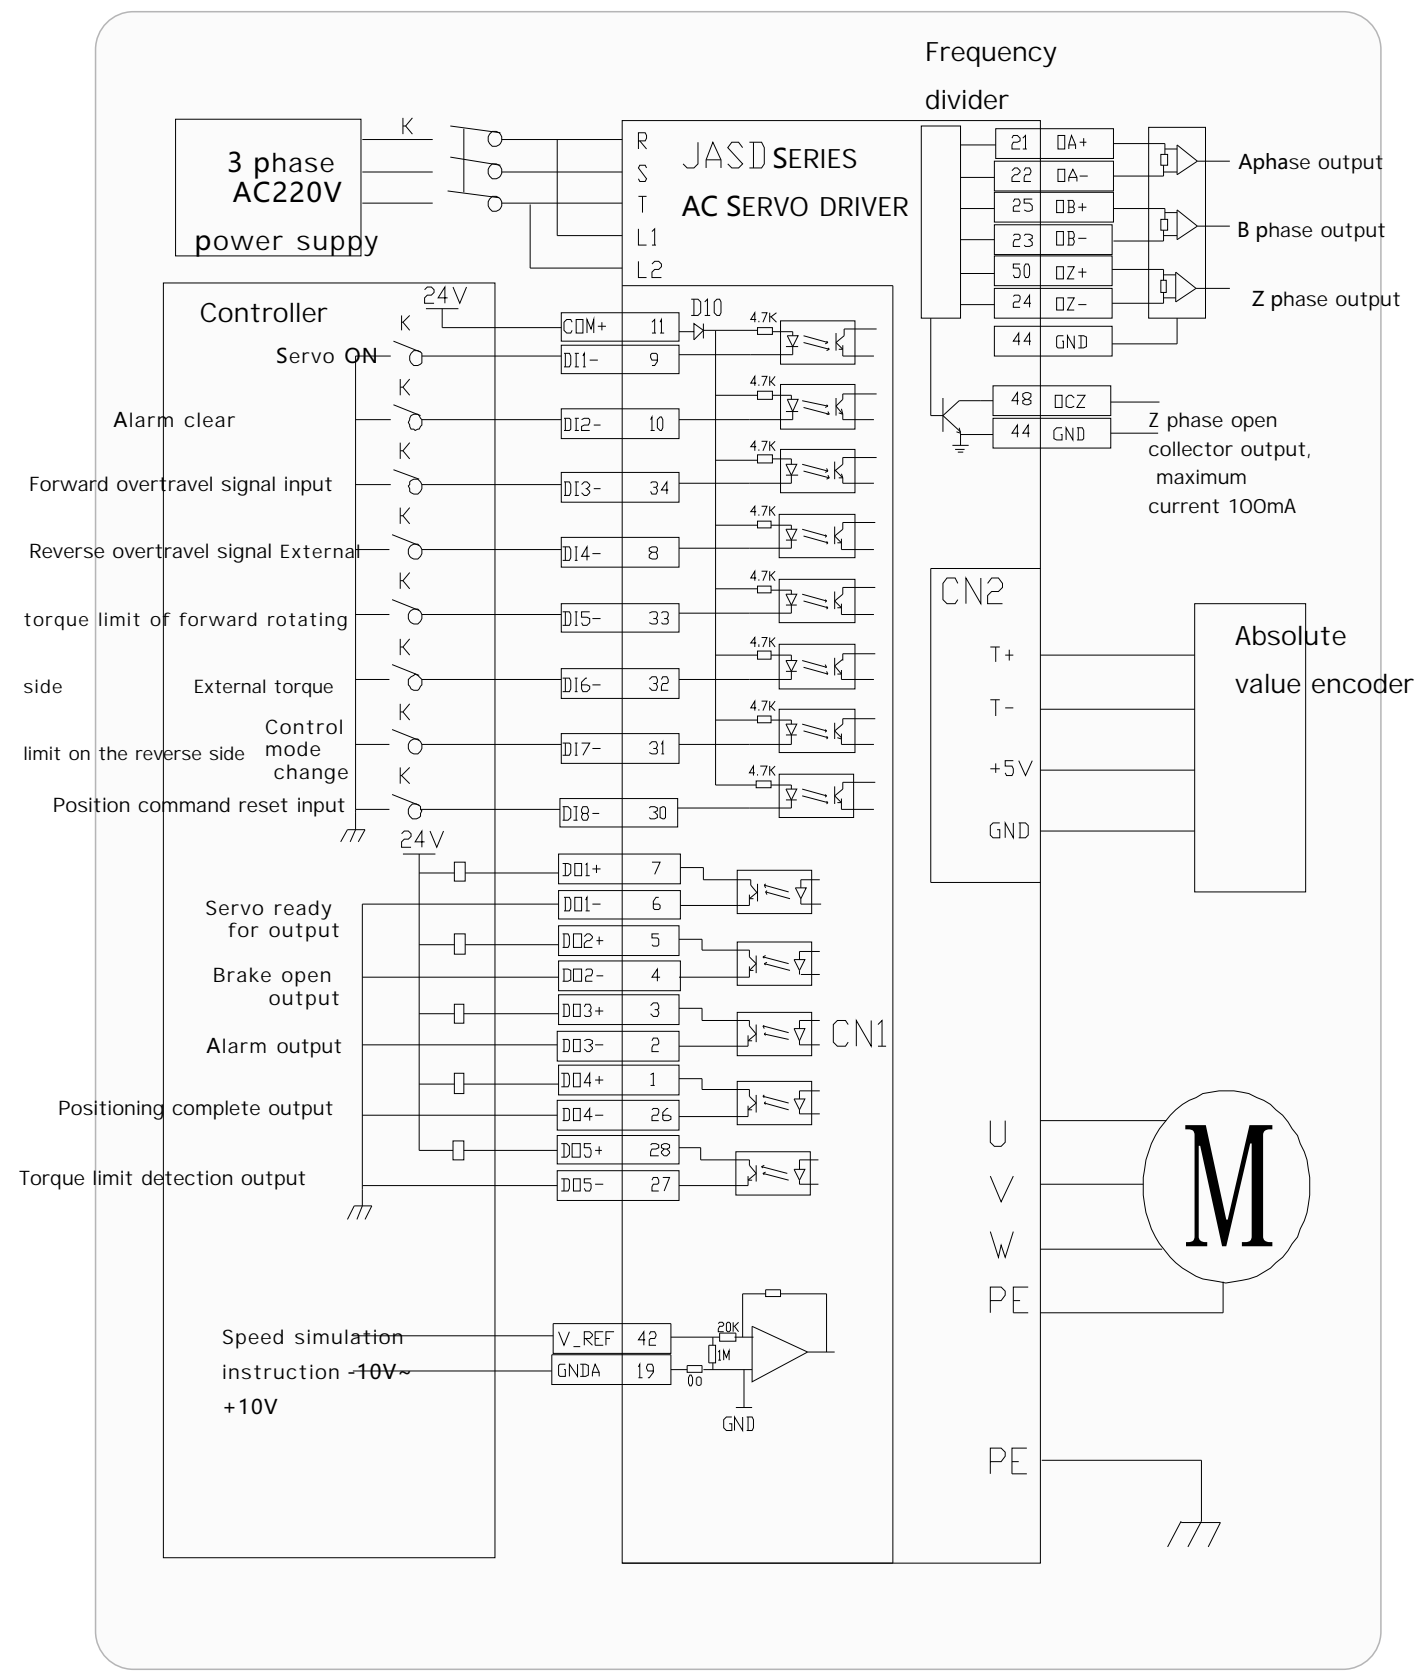

Item		Description
Control way		Single phase / three phase full wave rectification IGBT PWM Control sine wave current drive mode
Feedback		Incremental encoder absolute value encoder
Conditions of use	Temperature	work: 0~55℃ storage: -25~85℃
	Humidity	work: 10%~90%
	Altitude	When it is <1000m, it should be derated according to GB / T3859.2-93
	Protection grade	Protection grade: IP10, cleanliness: 2 environment without corrosive gas, combustible gas, no oil, water splashing dust, salt and metal powder
performance	Speed adjustment range	1:5000
	Speed stability accuracy	±0.01%: External load variation0~100% ±0.01%: Input power variation±10% (220V) ±0.1%: Ambient temperature度±25℃ (25℃)
	Speed response frequency	1200Hz
	Torque control accuracy	±2%
Input and output signals	Frequency division pulse output of encoder	A phase、B phase、C phase : Linear drive output Frequency division pulse number: can be set arbitrarily
	Input signal	Points: 8 functions: servo on, alarm clear, forward overtravel signal input, reverse overtravel signal input, control mode switch, P action command input, forward rotation side external torque limit, reverse side external torque limit, gain switching input, zero position fixed input, command pulse forbidden input, encoder absolute value data requirement input, internal set speed switching input 1, internal setting speed control input Part 2 set speed switch input, internal set speed switch input 3, position command reset input, magnetic pole detection input, command pulse input rate switch input
	output signal	Points: 5 functions: alarm output, brake opening output, servo ready output, positioning completion output, positioning approach output, speed consistent output, motor zero speed output, torque limit detection output, speed limit detection output, warning output, command pulse input rate switching output
	Display function	High voltage power indicator, 6-bit 8-segment LED
Communication function	RS485	It supports Modbus protocol. Axis address: connect to PC through
	RS232	parameter setting
Regeneration treatment		Built in regenerative resistor or external regenerative resistor
Protection function		Over voltage, under voltage, over current, overload, etc

Standard wiring diagram of servo system control mode

● Position control

Note: 1、Do output port compatible with 5V ~ 24V power supply
2、High speed pulse and high speed direction support 3.3V ~ 5V input

Drive mounting dimensions (Unit: mm)

- Installation method
- 1) installation method: floor installation or panel installation is adopted, and the installation direction is perpendicular to the installation surface.
 - 2) Installation interval: when multiple drives are installed, the interval between drivers shall not be less than 50mm to ensure good heat dissipation.
 - 3) Heat dissipation: in order to ensure that the temperature around the drive does not rise continuously, there should be convection wind blowing to the driver in the electric cabinet.

Introduction of servo motor

Name rule of servo motor

60 JASM 5 04 2 30 K - 17BC - SC - ϕ 11 - 01

① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨ ⑩ ⑪

Symbol	Name	Illustration
	Base size	60 means 60 motor , 40、60、80、110、130 are available JASM
	Motor type	means JASM series AC servo motor
	Motor pole pairs	4 : 4 pole pairs ; 5 : 5 polar pairs ; Four pairs of poles are default
	Rated power of motor	02: 200W, 04: 400W, 07: 750W, 08: 850W, 10: 1KW, 13: 1.3KW, 15 : 1.5KW , 20 : 2.0KW , 30 : 3.0KW
	V oltage specification	1 means 110V , 2 means 220V
⑥	Rated speed of motor (r/min)	15: 1500, 20: 2000, 25: 2500, 30: 3000, 40: 4000
⑦	Motor output shaft type	K Keyway, f flat shaft, s-axis, G reducer adaptation, P special production
⑧	Encoder specification	2500: 2500line, 17BC/17BCT/17BCN: Single loop17bit, M17BC/M17BCT/M17BCN: Multi-loop17bit, 23B: Single loop 23bit, M23B: Multi loop 23 bit
⑨	Custom made selection	SCKeyway, f flat shaft, s-axis, G reducer adaptation, P special production
⑩	Motor shaft diameter	11 represents motor shaft diameter 11, default represents official standard shaft diameter, 40 motor standard shaft diameter 8, 60 motor standard shaft diameter 14, 80 motor standard shaft diameter 19110 motor standard shaft diameter 19130 motor standard shaft diameter 22
⑪	Motor version number	01 the 1st version, 02 : the 2nd version, and the default is the 1st version

Motor model: 60JASM504230K-17BC

Description of model definition: 60JASM series motor , 5 polar pairs, 400W, 220V, 3000rpm ,Keyway shaft type, single loop 17 bit encoder.

Accessories of JASD Series

Accessories list

● Drivers of JASD...-20B series and motor accessories of JASM...-17BC/17BCN

when Customers use our cables, each set of servo must be equipped							
CN1 I/O connector	R, S, T, L1, L2 terminal	U, V, W, B1, B2, B3 terminal	Power cable		Encoder cable		
Packaged with driver			Frame 80 and below	Frame 80 and above	40/60 frame	80 frame	Frame 8 above
3M is standard length, other length is available							

when Customers do not use our cable, then each set of servo must be equipped							
CN1 I/O connect	R, S, T, L1, L2 terminal	U, V, W, B1, B2, B3 terminal	Power cable adapter		Encoder cable adapter		
Packaged with driver			Frame 80 and below	Frame 80 and above	Frame 80 and below	Frame 80 and above	40/60 frame Frame 80 above

● Drivers of JASD...-20B series and motor accessories of JASM...-17BCT

when Customers use our cables, each set of servo must be equipped							
CN1 I/O connect	R, S, T, L1, L2 terminal	U, V, W, B1, B2, B3 terminal	Power cable		Encoder cable		
Packaged with driver			Frame 80 and below	Frame 80 and above	40/60 frame	80 frame	110 frame
3M is standard length, other length is available							

when Customers do not use our cable, then each set of servo must be equipped							
CN1 I/O connect	R, S, T, L1, L2 terminal	U, V, W, B1, B2, B3 terminal	Power cable adapter		Encoder cable adapter		
Packaged with driver			Frame 80 and below	Frame 80 and above	Frame 80 and below	Frame 80 and above	40/60 机座 Frame 80 above

Description of JASD series AC servo accessories

● Adapter definition of JASM**-17BC/17BCN motor

a) Serial number and definition of power adapter pin

【Motor frame is 80 and below】

No.	Definition
1	U
2	V
3	W
4	PE

【Motor frame is 80 and above】

No	Definition
1	PE
2	U
3	V
4	W

b) Serial number and definition of encoder adapter pin

【Motor frame is 80 and below】

No.	Definition	No.	Definition
1	T+	6	B-
2	/	7	+5V
3	B+	8	GND
4	T-	9	Shielding wire
5	/		

【Motor Frame above 80】

No	Definition
1	Shielding wire
2	T+
3	T-
4	+5V
5	GND
6	B+
7	B-

● Motor adapter definition of JASM**-17BCT series

a) Serial number and definition of power adapter pin

【Motor frame is 80 and below】

No.	Definition
1	U
2	V
3	W
4	PE

【Motor Frame above 80】

No.	Definition
1	PE
2	U
3	V
4	W

b) Serial number and definition of encoder adapter pin

【Motor frame is 80 and below】

No	Definition	No.	Definition
1	T+	6	B-
2	/	7	+5V
3	B+	8	GND
4	T-	9	Shielding wire
5	/		

【Motor Frame above 80】

No	Definition
1	Shielding wire
2	T+
3	T-
4	+5V
5	GND
6	B+
7	B-

● Serial number and definition of driver **CN2** port docking plug pin

400w and below 400W

No	Definition
1	+5V
2	GND
3	/
4	/
5	T+
6	T-
Terminal housing	Shielding wire

Above 400W

No.	Definistion
4	T-
5	T+
13	GND
14	+5V
Terminal housing	Shielding wire

Precautions for use and commissioning

The installation and use environment has a direct impact on the normal operation and service life of the product, so the following conditions must be met:

- Working environment temperature: 0 ~ 55℃；working environment humidity: below 10% ~ 90% (no condensation).
- Storage environment: - 20℃ ~ + 85℃；storage environment humidity: below 93% (no condensation).
- Vibration: below 0.5g.
- Prevent rain dripping or wet environment.
- Avoid exposure to sunlight.
- Prevent oil mist and salt erosion.
- Prevent corrosive liquid, gas, etc.
- Prevent dust, cotton wadding and metal filings from invading.
- Keep away from radioactive and combustible materials.
- Space should be reserved around the location of the driver in the cabinet to facilitate loading, unloading and maintenance.
- Pay attention to the air flow in the cabinet. If necessary, install an external fan to enhance the air flow and reduce the ambient temperature of the driver to facilitate heat dissipation. The long-term working temperature is below 55℃.
- Try to avoid vibration source nearby, and install damping devices such as vibration absorber or anti vibration rubber gasket.
- If there are electromagnetic interference sources nearby, the power supply and control circuit of the driver are easy to be interfered and cause misoperation. Noise filter can be added or various effective anti-interference measures can be adopted to ensure the normal operation of the driver Operation (noise filter will increase leakage current, isolation transformer should be installed at the power input of driver).
